

Training and Learning Policy

Company Name	TCS (Tera Company Service)
Document Title	Training and Learning Policy
Policy ID	TCS-HR-013
Version	1.8
Effective Date	01-Apr-2025
Last Updated	12-Jul-2026
Document Owner	Head of Learning & Development
Department	Human Resources
Confidentiality	Internal Use Only

1. Purpose

This policy outlines the training programs available to TCS employees, mandatory learning requirements, and support for professional certifications.

2. Scope

Applies to all employees, with certain mandatory modules applicable from Day 0 of employment.

3. Definitions

LMS (Learning Management System)	The e-learning platform hosting mandatory and elective training modules.
Certification Reimbursement	Financial reimbursement for approved professional certification exam fees.

4. Mandatory Training

All employees must complete the following mandatory training modules within 15 days of joining, and refresh annually thereafter:

- Information Security Awareness (see Cyber Security Policy, TCS-IT-002).
- Prevention of Sexual Harassment (POSH) at Workplace.

-
- Code of Conduct and Business Ethics (see Code of Conduct, TCS-HR-014).
 - Data Privacy Fundamentals.

Completion status is tracked in the LMS and visible to the employee's Reporting Manager and HRBP. Non-completion beyond the deadline may result in restricted system access and is flagged during performance review.

5. Technical Training

Role-specific technical training is coordinated by the Reporting Manager during the first month of employment (see Onboarding Policy, TCS-HR-006) and on an ongoing basis as new tools, frameworks, or client technologies are adopted. TCS provides free access to LinkedIn Learning and Coursera for Business for all employees.

6. Soft-Skill Training

TCS offers periodic workshops on communication, presentation skills, negotiation, and leadership, delivered quarterly by the L&D; team or external facilitators. Employees can self-nominate via the LMS or be nominated by their manager as part of a development plan.

7. Certification Programs

TCS supports employees in obtaining industry-recognized certifications relevant to their role (e.g., AWS, Azure, PMP, Scrum Master). Employees can request certification support via the LMS, specifying the certification and business relevance, subject to manager approval.

8. Training Hours

Employees are expected to dedicate a minimum of **24 hours of learning per year** (technical or soft-skill), tracked via the LMS. Time spent on mandatory compliance training and approved certification study leave counts toward this target.

9. Learning Platforms

The primary platforms are the internal LMS (mandatory training and tracking), LinkedIn Learning, and Coursera for Business (elective courses). Access credentials are provisioned automatically during onboarding.

10. Certification Reimbursement

TCS reimburses **up to \$40,000 per employee per calendar year** for approved certification exam fees and official prep materials. Reimbursement is processed after successful completion of the certification, upon submission of the certificate and receipt via the Expense module, per the Expense Reimbursement Policy

(TCS-FIN-002). If an employee fails to pass the certification, a one-time re-attempt is reimbursed; subsequent attempts are at the employee's own cost.

11. Manager Approval

Certification and elective training requests require Reporting Manager approval to confirm relevance to the employee's role or career path. Mandatory compliance modules do not require approval and must be completed regardless.

12. Training Completion Requirements

Employees who leave TCS within 12 months of receiving certification reimbursement of ■15,000 or more may be required to repay a prorated portion of the reimbursed amount, as specified in the Certification Reimbursement Agreement signed at the time of the request.

13. Frequently Asked Questions

Q: Does the company pay for certifications?

A: Yes, TCS reimburses up to ■40,000 per employee per year for approved certification exam fees, processed after successful completion via the Expense module.

Q: Which training programs are mandatory?

A: Information Security Awareness, POSH, Code of Conduct and Business Ethics, and Data Privacy Fundamentals are mandatory within 15 days of joining and refreshed annually.

Q: How many learning hours am I expected to complete each year?

A: A minimum of 24 hours per year, tracked through the LMS, including mandatory and elective training.
